Gunnersbury Park Controlled Parking Zone - How it may look

This plan is intended is to give residents and businesses an idea of how a CPZ may look if one is introduced. Where possible, existing parking arrangements would be retained. Shared-use bays are shown along flank walls and adjacent to parkland and short stay parking bays are placed in areas convenient for shops. Waiting restrictions would be provided to improve safety, accessibility and traffic flow.

Please note, this plan is only intended to demonstrate how a CPZ may look. Should the CPZ proceed, a more thorough study of the area will be undertaken during the detailed design phase.
