Electric Vehicle Charging Points

Madeley Road

Ealing Council

www.ealing.gov.uk
We are writing to inform you of the Council’s proposal to implement new electric vehicle charging point bays in Madeley Road.

Ealing Council and the Mayor of London have a shared vision to make vehicles cleaner and healthier so we are actively working to develop an electric vehicle charging network for emission-free electric vehicles across the borough. We are committed to rolling out a network of electric vehicle charging points (EVCPs) to encourage people who live, work and visit the borough to use electric vehicles for their journeys, where they feel a vehicle is necessary.

As electric vehicles become more widespread and popular, the demand for charging points is growing. Benefits to owning and using an electric vehicle as opposed to a petrol/diesel vehicle include:

- Exemption from vehicle tax, London’s Congestion and forthcoming Ultra Low Emission Zone Charges.
- Discounted residents’ permit charges.
- Zero exhaust emissions, contributing to our ambitions to reduce nitrogen dioxide emissions in the borough and improve air quality.
- Less noise pollution as electric vehicles are quieter than petrol/diesel vehicles.

This proposed EVCP is being privately funded as part of the Borough’s contract with Source London, which is a network of EVCPs across London. The network is now being developed and managed by Bluepoint London (BPL). More information, including how the service operates and frequently asked questions, can be found by visiting the following link:

www.sourcelondon.net

Various technical aspects are also taken into consideration to ensure the safety of users. For example, a minimum of two metres must be allowed between the charging point, parking bay and any other electrified objects (such as street lighting). Resident requests for EVCPs, as well as Source London members and data on where EVCPs are already registered, also play a role.
Madeley Road

What is being proposed?

We are proposing to introduce two Electric Vehicle Charging Points (EVCPs) in Madeley Road. The EVCPs would occupy two existing parking bays as shown below. These bays would be reserved for those with electric vehicles needing to use the charging points.

The street-view image and plan below, show where the electric vehicle bays are proposed. Examples of the charge unit and feeder pillars are also shown. Coloured LEDs at the top of the EVCPs improve visibility for visually impaired residents and indicate the usage status of the charging points.
Do you have any comments?

You can comment on the proposals online on at:

www.ealing.gov.uk/evchargingealing

Alternatively, if you do not have access to the internet, you may give your comments by post to:
Transport Services, Ealing Council, Perceval House, 14-16 Uxbridge Road, London W5 2HL

Please give your comments by Friday 19 July 2019

What happens next?

Subject to the results of the consultation, the proposed works are scheduled to be implemented by Nov 2019. The charge point is being funded by Source London.

Prior to implementation, statutory consultation will be undertaken, which will involve advertising the changes in the Ealing Gazette and placing notices at the proposed location. This will provide the public with a further opportunity to comment on the proposals.

Further information

If you would like further information regarding this consultation, which is not covered within this information booklet, you can contact us in Transport Services:
