

TOWN BRIEFING: HANWELL

JUNE 2022

EALING'S SEVEN TOWNS

Ealing is home to seven towns. Each town has a strong local identity with its own unique character, needs and opportunities. The seven towns approach is integral to the council's strategy and is at the centre of Ealing's approach to the new Local Plan. The OPDC area is located in the north east of the borough, and contains a significant proportion of the borough's high-value economic activity. OPDC is a Mayoral Development Corporation and is responsible for overseeing one of Europe's largest regeneration programmes. This town briefing focuses on the Hanwell sub-area.

HANWELL TOWN BRIEFING

This Town Briefing provides high-level insight into the socio-economic character and performance of Hanwell. It sets out how London and Ealing's economy has changed, before outlining how these factors are shaping prosperity and opportunity in Hanwell. The Town Briefing is designed to inform local priorities - providing an evidence-led starting point for the Town Forums.

Ealing's Economic Context

Chapter 1 outlines how London's economy has changed over the last decade. It shows how Ealing's economy performs against the other 32 London boroughs, and evidences some of the key factors affecting prosperity in the borough.

Despite decades of growth, inequality and poverty across London and Ealing have increased. There is already significant work underway to support an economy which is fairer, greener, and more resilient.

The evidence included within the Town Briefing has been structured to align with the economic priorities set out within the Corporate Plan. This includes:

- **Jobs and Homes**
- **Environment and Economy**
- **Equality and People**

This chapter contains several key factors that will define prosperity at a borough and local level. This includes a summary of the action the council is already taking, and information about relevant economic strategies, projects, and plans. Population data will be updated in Autumn 2022 following the publication of 2021 Census data at a town-level.

Hanwell's Economic Profile

Chapter 2 provides high level intelligence showing how Hanwell performs against Ealing's other six towns, as well as the borough and London averages.

Economic evidence shows that Hanwell performs poorly against affordability and economic growth indicators. However, Hanwell performs strongly against earnings and COVID-19 resilience measures.

Hanwell's Assets

Chapter 3 provides a review of the key assets that are important for local prosperity, vitality, and pride. This includes a review of major employers, public sector assets, cultural infrastructure, and the key developments planned for Hanwell.

Hanwell has a range of community, economic, and cultural assets which are integral to local prosperity.

Hanwell's challenges

Chapter 4 focuses on several key local challenges facing Hanwell's economy and residents. Using the data gathered in Chapters 1, 2, and 3 - and intelligence gathered from other evidence studies commissioned by the council - this outlines the key economic challenges facing the town.

Key challenges include an ageing shrinking population which could affect service delivery and place vitality, and a lack of higher value jobs.

Hanwell's opportunities

Chapter 5 sets out three potential opportunities to explore within Hanwell over the next four years. Drawing on national and international case studies, this chapter presents the art of the possible and outlines potential priorities and areas of action which could be taken forward through the Town Forums.

There are opportunities to provide a range of housing typologies to meet the needs of Hanwell's diverse communities; and to do more to maximise the economic benefits associated with Crossrail to unlock the town's nascent potential.

About this briefing:

This briefing has been compiled by PRD in partnership with Ealing Council. PRD are a place and economy consultancy and have recently been supporting the council to develop the evidence base to inform the Local Plan as part of the Industrious Ealing workstream.

The content of this briefing is not intended to be exhaustive. It has been designed to provide a snapshot of local economic performance to enable local leaders, residents, and businesses to identify shared priorities.

CHAPTER 1

EALING'S ECONOMIC CONTEXT

LONDON'S ECONOMIC EVOLUTION...

Despite a decade of economic growth, London's economy has become increasingly unequal. These long-term challenges have been brought to the fore by the COVID-19 pandemic and the cost of living crisis.

A DECADE OF GROWTH...

London's has grown significantly over the last ten years across a range of top level socio-economic measures.

London's population grew by 7.7% between 2011 and 2021 the number of businesses and jobs have increased significantly. Much of this has been high value economic activity, with the number of high value/knowledge-intensive businesses increasing by 72% since 2010.

BUT FOR MANY, WORK IS FAILING TO PAY AND INEQUALITY IS WIDENING...

Despite sustained economic growth, many Londoners are not sharing in the city's success.

27% of Londoners live in poverty (the highest poverty rate in the UK), with almost one in three workers earning an income below London Living Wage (GLA Datastore).

Between 2015 and 2019, the number of children in absolute low income households in London increased by 12%. This is all being driven by children living in working families – showing that employment is not always providing a reliable route out of poverty.

Currently, the ratio of income between the top 10% and bottom 10% of earners in London is around, 10:1, around double the rate of inequality in the rest of the county. This has not changed a great deal in the last decade, but the factors contributing to poverty and inequality have. This includes:

- **Feeling Well** - General feelings of wellbeing and life being worthwhile have not improved at the same rate as the rest of the country in the last decade.

- **Disproportionality** – According to JRF, the poverty rate for BAME households in London is 38%. If you are from a non-white community you are more likely to experience poor mental and physical health, with younger people even more likely to be disproportionately impacted by poverty.
- **Housing Costs** – The average home in London costs around 13 times the average income, around double the rate in the North West or Midlands. Over 50% of Londoners live in rented accommodation and the market has returned quickly to its pre-pandemic rate.

THESE FRAGILITIES HAVE BEEN EXPOSED BY THE PANDEMIC...

Long-term inequalities have been exposed and accentuated by the pandemic.

This is reinforced by the following indicators:

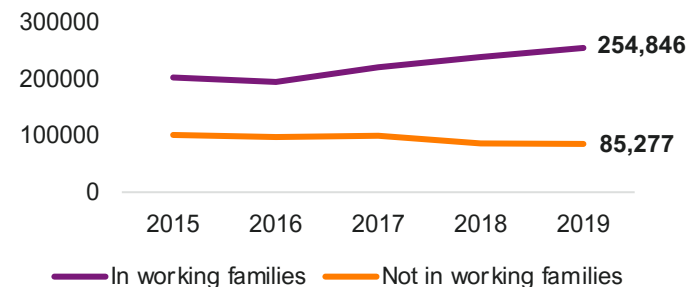

- **Food** – Between 2010 and 2020 the number of Londoners relying on foodbanks has increased from around 12,000 to over 200,000; this has subsequently doubled to over 400,000 since the start of the pandemic (Statista)
- **Work Security** - London saw the biggest decline of PAYE employees of any region nationally and recovery took significantly longer. 1m Londoners were furloughed; In the boroughs with the highest rate - in Barnet, Brent, Hounslow, Newham and Redbridge, one in ten workers were still furloughed when the scheme ended

The economic resilience of Ealing's poorest households is likely to be further tested by the cost of living crisis – heightening the importance of targeted local action.

London business change, 2010-2020

Change in children in absolute low income households by parental work status in London, 2015-2019

EALING'S PERFORMANCE IN LONDON: JOBS AND HOMES

FACTORS SHAPING PROSPERITY: HOUSING AFFORDABILITY

WHAT THE DATA SHOWS...

Housing affordability is an economic issue and is the primary determinant of deprivation in the borough.

Housing in Ealing has been consistently more unaffordable than the London average for the last two decades. In 2021, the average house price in Ealing was almost 16 times average earnings, compared to 14 times in London as a whole.

Affordability challenges are most acute in the borough's metropolitan core – specifically the towns of Ealing, Acton, and Hanwell.

Housing affordability is the primary driver of deprivation across Ealing. 71% of neighbourhoods across the borough fall within the top 20% most deprived nationally for the barriers to housing and services sub domain (Indices of Multiple Deprivation, 2019).

Despite significant housing delivery in Ealing this has not addressed affordability challenges. Over 5,000 new homes have been delivered in the borough since 2017 (Housing Delivery Test).

WHAT THE COUNCIL IS ALREADY DOING...

There is a clear role for the local authority to address a lack of affordable housing supply in the borough. Since 2017 over 2,500 genuinely affordable homes have been delivered for Ealing's residents. Broadway Living has been set up as the council's housing company to directly deliver homes.

Broadway Living plays an important role in addressing Ealing's housing affordability challenges.

The council has directly delivered 460 of the new homes. The rest have been built by housing associations and private developers thanks to the council's planning system, which ensures that a proportion of all new homes are let at affordable rents.

Housing affordability Ratio, 2018

Housing affordability Ratio, 2002-2021

FACTORS SHAPING PROSPERITY: QUALITY OF WORK

WHAT THE DATA SHOWS...

Ealing hosts high quantities of low paying employment. The borough has also seen a sharp decline in higher value 'knowledge intensive' jobs in recent years.

Ealing hosts the sixth highest number of jobs (31,000) paying less than the London Living Wage (as set by the Living Wage Foundation).

The 2021 Low Pay Commission Report helps to understand the spatial distribution of low pay in the borough. This defines low paying sectors as: "industries which contain a high number or large proportion of low-paid workers based on the Standard Occupation Classification (SOC) and Standard Industrial Classification (SIC) codes published by ONS." Lowest paying industries in London include Accommodation and Food (£16,303) and Wholesale and Retail (£22,974).

40% of Ealing's jobs are in typically low paying industries compared to the London average (33%).

Ealing has also seen a reduction in higher value employment. Between 2019-2020, the number of knowledge intensive jobs in the borough fell by 8%, compared to a 4% growth in London as a whole.

THIS IS BEING IMPACTED BY...

The COVID-19 pandemic has exposed challenges around the quality of work and Ealing has been acutely affected.

Insecure and low quality work has meant that Ealing's economic exposure was high going

into the pandemic. At the end of the furlough scheme, Ealing had the second highest number of residents on furlough of anywhere in London (75,000).

Since the start of the pandemic, an additional 5,500 residents have become unemployed – the fourth highest in London. The council has an important role to play in both job brokerage, and encouraging good work across the borough.

WHAT THE COUNCIL IS ALREADY DOING...

Ealing Council have supported residents and businesses throughout the pandemic. The council will now begin its long-term planning in relation to the economy.

At the start of the pandemic, the council launched its 'Ealing Together' initiative, which inspired over 1,000 local volunteers to be registered and helped the council deliver 14,000 food parcels to shielded and most vulnerable residents. Between April and September 2020, the Council also allocated nearly £78M in grants to 5,672 small and medium businesses to give them the best chance of surviving the initial lockdown.

The Council's Plan for Good Jobs (see page 12) includes ongoing economic priorities for the next 12 months.

The Council also intends to develop an Inclusive Economy strategy to guide a long-term strategic approach to engagement with the economy, and address these fundamental, long-term challenges.

% of jobs in typically low paying sectors

Number of jobs in Ealing paying less than the London Living Wage, 2006-2018

FACTORS SHAPING PROSPERITY: POVERTY

WHAT THE DATA SHOWS...

There is evidence to suggest that the amount of poor quality work is contributing to challenges of low earnings, deprivation, and in-work poverty.

Across a range of traditional economic measures, Ealing would be perceived to be performing well. For example, economic activity is high. 81.4% of residents are economically active compared to 79.3% in London as a whole. More people are now in work than ten years ago – but there is evidence that this is not always providing a reliable route out of poverty.

Resident earnings in Ealing are low and the borough has the fifth lowest median earnings in London. On average, residents are earning 9% less than the London average.

However, this varies significantly across the borough. There is an East/West poverty divide with high concentrations of low income households in the West of the borough. This challenges is most acute in Southall and Northolt.

This is evidenced by the fact that in-work poverty is on the rise. Over the last few years, the borough has experienced an increase in children living in absolute low income households. An individual is in absolute low income (or absolute poverty) if they are living in households with income below 60% of the 2010/11 median, uprated for inflation. By using an income threshold that is fixed in time, this measure looks at how living standards of low-income households are changing over time (House of Commons Library).

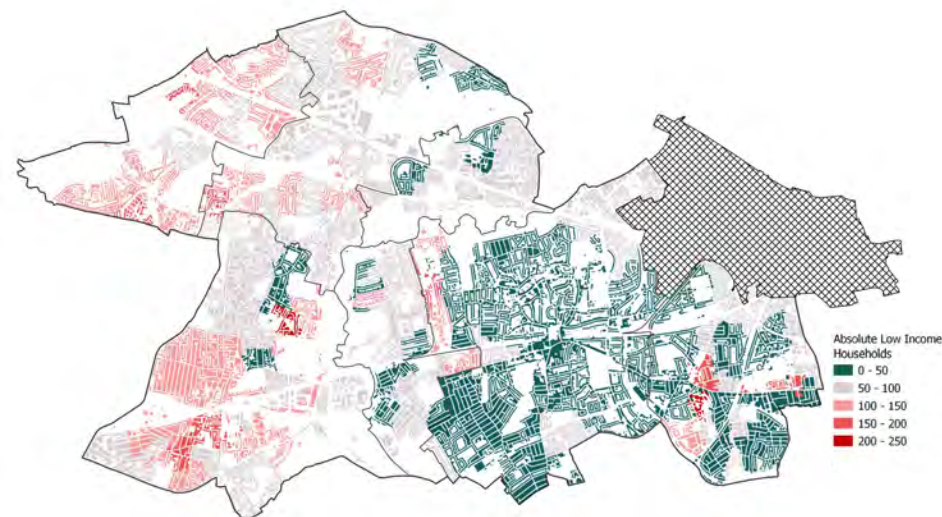

Low earnings, high housing costs, and poor quality work will all affect the economic resilience of households in the short-term as the cost of living crisis continues to bite.

WHAT THE COUNCIL IS ALREADY DOING...

Ealing council is already providing significant additional help to support for residents on low incomes. This includes:

- **Local Welfare Assistance scheme:** Local welfare assistance is a discretionary support scheme. The fund is there to help people to try to maintain an independent life or for those facing an immediate financial crisis. Ealing residents could be eligible for extra financial support over winter through this scheme. Residents who have unsuccessfully applied before may be able to receive help under the new rules.
- **Council tax support scheme:** Our council tax support scheme provides up to 100% discount on bills to the most vulnerable. Around 16,500 working age Ealing residents, and 7,400 pensioners, currently receive help paying their council tax through this scheme. That's around one out of every six households.
- **Free school meals:** Families with children who receive certain benefits, or who have no recourse to public funds, are strongly encouraged to apply for free school meals.

Number of children living in absolute low income households, 2019/20

Change in children in absolute low income households, 2015-2020

FACTORS SHAPING PROSPERITY: EALING'S GROWTH OPPORTUNITY

WHAT THE DATA SHOWS...

Despite the challenges facing the borough, Ealing has an unprecedented opportunity for growth. Ealing Council can play an important role in curating this demand to help address deeply embedded challenges.

Ealing's economic growth opportunity is centred on its industrial land.

Between 2010 and 2015, London released three times more than the recommended amount industrial land - losing around 23% of its industrial land since 2000. The release of industrial land in Ealing has been far less severe and Ealing has only lost 8% of its industrial land supply. Ealing now contains 8% city's industrial land (We Made That) – making it integral to the functioning of London's economy.

Ealing's vacancy rate is extremely low (3%). Typically, anything under a 5% vacancy rate leads to market compression and excessive rent rises. This is shown through industrial rents in the borough which have grown by 94% since 2009. This also shows that the market is undersupplied (Iceni) and would be quickly absorbed if new space became available.

The borough therefore has an important role as curators of this demand to ensure that this unprecedented opportunity maximises benefits for Ealing's residents.

The evidence shows that Ealing's industrial areas have been the primary drivers of growth. The map (right) shows that the borough's designated industrial areas have delivered the

biggest employment growth for Ealing since 2016. The biggest job growth has been in Strategic Industrial Land (SIL) in Greenford and Perivale, and Locally Significant Industrial Sites (LSIS) in Southall.

WHAT THE COUNCIL IS ALREADY DOING...

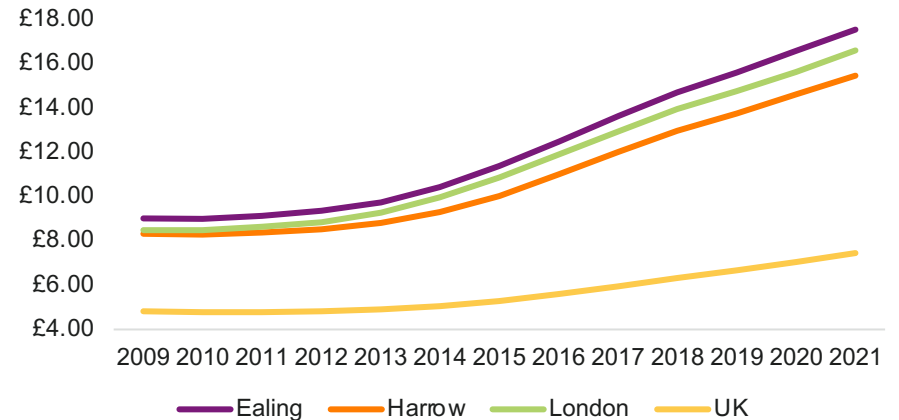

Industrious Ealing will provide the council with the evidence base to proactively shape demand to maximise benefits for its residents.

Industrious Ealing will provide a detailed evidence base to define industrial priorities. This will understand the opportunities to: retain, create, and intensify industrial land supply through planning policy.

It will also outline the wider levers that the council could consider to maximise Ealing's industrial growth opportunity such as:

- Industrial intensification: understanding the potential to increase employment densities on industrial sites to create more jobs and make the best use of space.
- Co-location: where sensible and viable, exploring where residential and industrial uses can be located in close proximity to create thriving, mixed-use neighbourhoods.
- Growing and greening existing sectors: understanding how the green and low carbon economy can be supported to grow in industrial areas to accelerate the transition to net zero and create good new jobs.

Average industrial rents per sqft, 2009-2021

Employment change, 2016-2020

RESPONDING TO THE EVIDENCE: EALING'S THREE ECONOMIES

Socio-economic indicators show that Ealing's seven towns can be simplified into three economic geographies, each with their own specific strengths, weaknesses, opportunities and priorities for action. Greenford's economy is intrinsically linked to Perivale and the two sub areas share economic specialisms, identities, and potential for growth.

Southall & Northolt

- Where challenges of deprivation, low pay, and poverty are most acute.
- Strong foundational economies which provides significant amounts of local employment.
- Acutely affected by the pandemic and are more reliant on supply chain linkages to Heathrow.
- Significant public sector assets can provide increased influence and scope to enact change/embed political ambition.

Greenford & Perivale

- Smaller town centres where industrial areas are the primary economic driver.
- Hosts the borough's largest employers in employment terms.
- Influenced by major land owners such as SEGRO.

Acton, Ealing, Hanwell

- Connected by the Uxbridge Road
- Hosting the borough's 'high value' employment
- Larger high street centres which are key economic hubs
- Where affordability challenges for residents and businesses are most acute.

RESPONDING TO THE EVIDENCE: KEY STRATEGIES, PLANS, AND POLICIES

Ealing Council has developed a number of policies, plans, and strategies to tackle the climate emergency, deliver good jobs, and reduce inequality.

Plan for Good Jobs (2021): The plan outlines actions the council will take over the next 12 months, and the measures of success for the council. The Plan for Good Jobs includes priorities to: support the borough's hardest hit residents; investing in the borough's most left behind towns and communities; protecting, nurturing and expanding businesses in the borough; and promoting the green recovery.

Social Value Policy (2022): The goods and services that Ealing Council buys are an important lever the council possesses to drive improved social, economic, and environmental outcomes. The borough's new Social Value Policy includes a commitment to reviewing procurement thresholds to support, and channel greater procurement spend directly and through supply chain to our local economy to help accelerate economic recovery. The policy also includes requirements for contractors agree to our Ethical Code as a condition of trading with the council and to confirm that supplies, services and works are safe, that workers are treated with respect and dignity and that manufacturing processes are environmentally responsible.

Ealing Race Equality Commission (2022): The Ealing Race Equality Commission was set up to explore how structural race inequalities persist in Ealing and its built environment, acting as a barrier to prosperity and security to Ealing's diverse community. By engaging with the community, employers and professionals, the commission delves into challenges and recommendations for existing issues in education, employment, health, income, crime and justice and community participation and democracy.

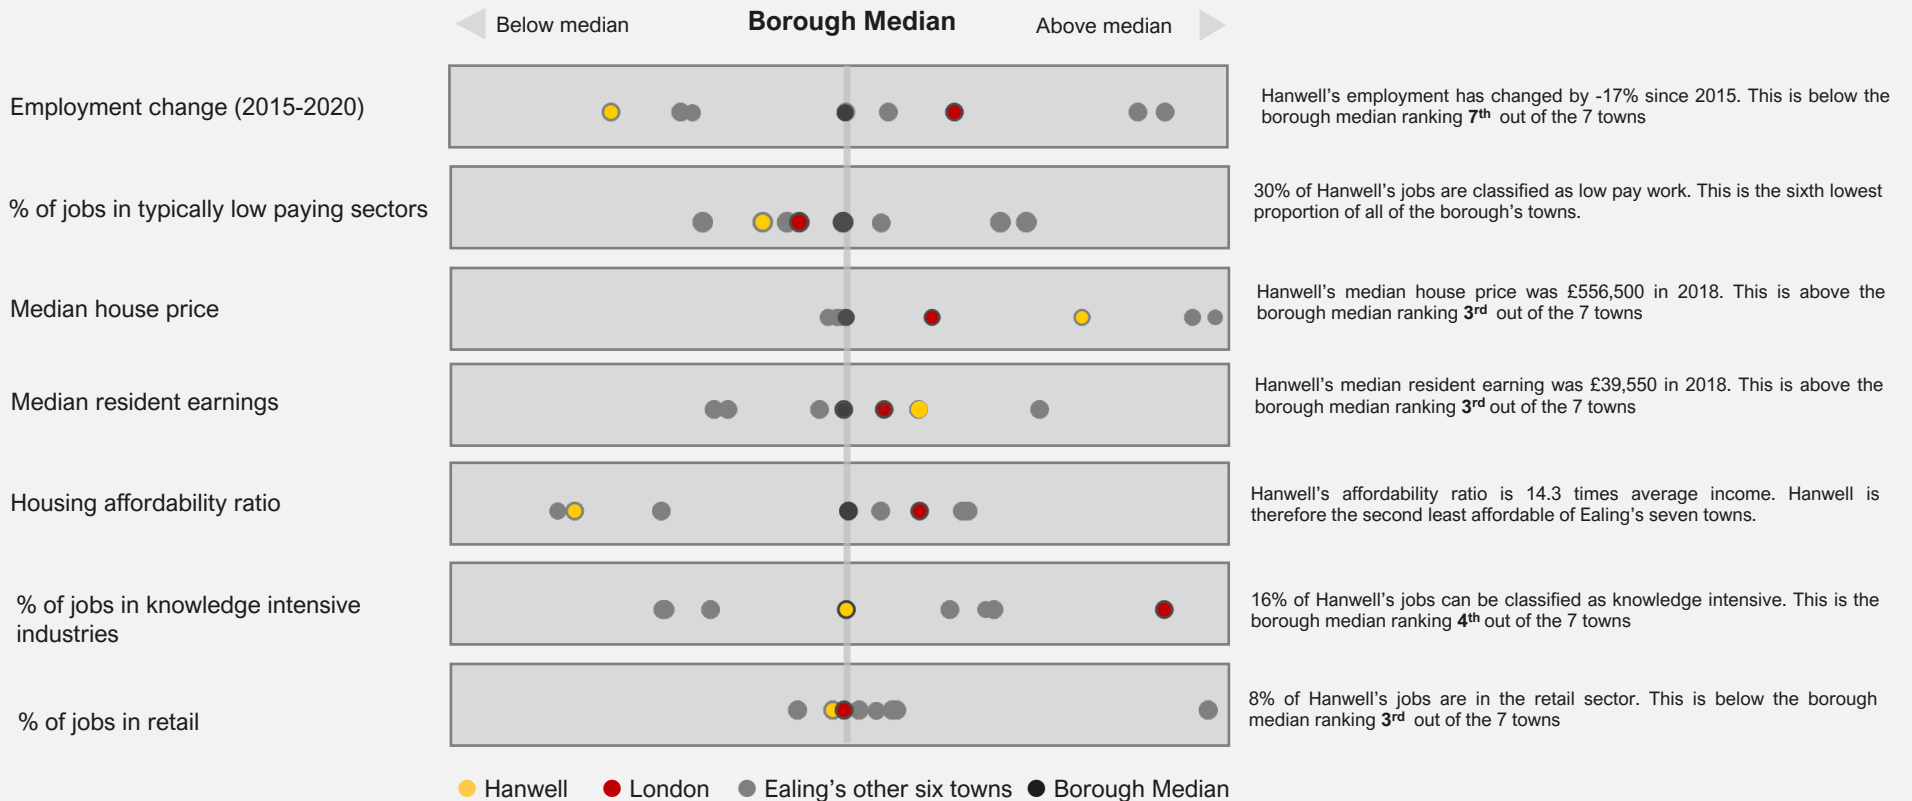

Shaping Ealing and the Local Plan (2022): Shaping Ealing is the engagement activity that will inform the local plan. The Local Plan is the council's key policy lever that will be used to shape how land is used and how places across the borough may change over the next 15 years. In addition to consultation, the local plan will be evidence bases which will underpin planning policy. Key economic studies include an updated employment land review, Industrious Ealing (which will define the borough's approach to industrial land), and Affordable Workspace strategies. This also includes bespoke 20-minute neighbourhood studies for Greenford and Perivale, Northolt, and Acton which will inform spatial strategies in these places.

CHAPTER 2

HANWELL'S HEADLINE ECONOMIC PERFORMANCE

HANWELL'S HEADLINE ECONOMIC PERFORMANCE: JOBS AND HOMES

HANWELL'S HEADLINE ECONOMIC PERFORMANCE: ENVIRONMENT AND ECONOMY

HANWELL'S HEADLINE ECONOMIC PERFORMANCE: EQUALITY AND PEOPLE

HANWELL'S HEADLINE ECONOMIC PERFORMANCE

STRENGTHS

- + **COVID-19 economic resilience:** Hanwell experienced the lowest increase in the number of claimants since the start of the pandemic, indicating higher quantities of more resilient employment.
- + **Limited presence of low paying sectors:** Hanwell has one of the lowest proportions of jobs in low-paying sectors. See Page 10 for a definition of low paying sectors.
- + **High earnings and low levels of child poverty:** Median resident earnings are above the borough average and child poverty rates are amongst the lowest in Ealing.

WEAKNESSES

- **Housing affordability:** Hanwell has the 3rd highest house prices in the borough. Local resident earnings have not kept pace with house price growth and Hanwell is the second least affordable town in the borough.
- **Decline in Employment:** While Hanwell's business base has grown over the last five years, this has not been matched by an increase in jobs. There has been a decline in employment, driven by a loss of Business Support and Manufacturing jobs (see Page 31).
- **Demographic challenges:** Hanwell has experienced the largest decline in population out of Ealing's 7 towns. The data also highlights a disparity in life expectancy: Hanwell ranks the highest in female life expectancy however it ranks lowest in male life expectancy.

CHAPTER 3

HANWELL'S ASSETS, STRENGTHS AND USP_s

WHAT WE'VE HEARD

The first phase of non-statutory engagement on the new Local Plan for Ealing was launched on 10 November 2021 as a suite of activity under the “Shaping Ealing” umbrella. It consisted of an online survey on the GiveMyView digital platform and a series of community engagement events held in various parts of the borough. The online survey has received 10,254 responses until 31 March 2022. The proportion of responses varies by area, and while responses from Ealing (41% of total as compared to 25% of the borough’s population resident in Ealing) and Hanwell (10% vs 8% population) towns are disproportionately larger, responses from all other town are smaller as compared to their populations. On the whole, Hanwell residents were more positive than the borough average. The key things which Hanwell residents were most positive about are presented below:

There was **52%** net agreement that Hanwell has good public transport. This is likely to improve with the arrival of Crossrail.

There was **44%** net agreement that people in Hanwell feel welcome in the local area.

There was **52%** net agreement that people from different backgrounds in Hanwell get on well together.

There was **41%** net agreement that Hanwell had access clean and safe parks and open spaces.

HANWELL'S POPULATION

Hanwell is home to **27,700** people according to the ONS Mid Year Population Estimates.

61% of Hanwell's population are educated to degree-level (NVQ 4+) compared to **66%** in Ealing and **60%** in London.

The average age of a Hanwell resident is **39**. This is higher than the median age of Ealing and London residents. Despite this, **24%** of Hanwell's residents are under the age of 15, compared **22%** in the borough as a whole.

16% of Hanwell's population have no qualifications compared to **7%** in Ealing, **6%** in London.

In 2011, **34%** of Hanwell's population was non-white. **15%** are Asian/Asian British and there is evidence to suggest the population is becoming increasingly diverse.

7.0% of Hanwell's economically active population are claiming benefits. This is slightly higher than the Ealing average which stands at **6.8%**.

HANWELL'S MAJOR EMPLOYERS (1)

The public sector is a major employer in Hanwell. There is an opportunity to diversify Hanwell's economy to capitalise on the arrival of the Elizabeth Line which is explored in more detail on Page 34.

Brentside High School

Co-educational secondary school and sixth form.

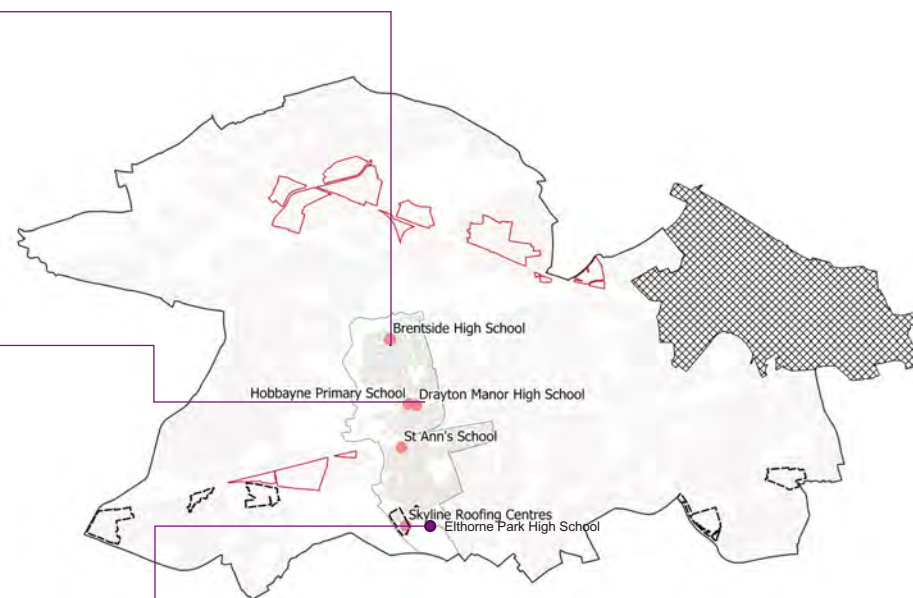

Drayton Manor High School

Academy, mixed school for 11 to 19 year olds.

Elthorne Park High School

Community, mixed school for 11 to 19 year olds.

HANWELL'S MAJOR EMPLOYERS (2)

St Ann's School

Secondary special school for ninety students aged 11 to 19 years with learning difficulties.

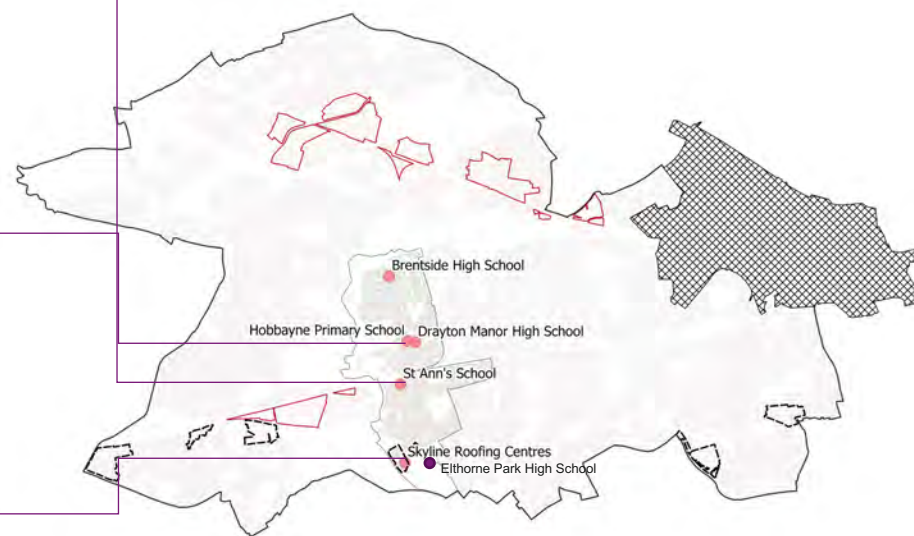

Hobbayne Primary School

A primary and nursery school.

Skyline Roofing Centres

Wholesale suppliers of wood, construction materials and roofing material.

HANWELL'S KEY PUBLIC SECTOR ASSETS

Hanwell Children's Centre: offers services for expectant parents, children aged 0-5 years and their families.

Copley Close Children's Centre (closed): offered services for families with children aged from 0-5 as well expectant parents.

Hanwell Nursery (part): offer childcare and early years education to children aged from 3 months up to 5 years.

Hanwell Zoo: a community zoo with goats, flamingos & peacocks, a cafe, children's play area & the Millennium Maze.

HANWELL'S KEY PUBLIC SECTOR ASSETS

Hanwell Community Centre: provides sports, arts and craft and educational facilities for the community, as well as a venue for hire.

Hanwell Health Centre: provides a wide variety of medical services and care for the community including a dentist, optician and baby clinic.

Cherington House (EIS): provides variety of acute mental health outpatient services.

Elthorne Sports Centre: provides a well-equipped gym as well as a sports hall with a range of facilities for sports like badminton, table tennis, football and netball.

HANWELL'S KEY PUBLIC SECTOR ASSETS

Brent Lodge Park: located within the Brent River Park, with extensive hay meadows and a tree-lined river, Brent Lodge Park also provides for children with play areas.

Hanwell Hootie: an annual festival that showcases a wide variety of musical talents, supporting local musicians and bringing residents together.

Hanwell Carnival: established in 1898, the annual Hanwell Carnival is community-run event with a host of activities for everyone.

HANWELL'S CULTURAL INFRASTRUCTURE

Dance Studios: Both of the dance studios in Hanwell are provided at two secondary schools: Elthorne Park High School & Brentside High School.

The Prince of Wales pub provides a venue in Hanwell for live music performances, gigs and shows.

Men at Work is a supplier of theatrical prop and costumes, specialising in street furniture and military.

Hanwell Library is a community managed library providing books, music, and host a range of clubs, classes and workshops for its residents.

Source: GLA Cultural Infrastructure Database

HANWELL'S MAJOR DEVELOPMENTS

High Lane Estate Regeneration

Regeneration of 264 council homes. The redevelopment will take two years to build each of three phases, with the whole scheme competing in 2027. The scheme will provide approx 450 new homes, a new community facility and a local shop.

Elthorne Works, Trumpers Way

Proposed residential and light industrial co-location in Trumpers Way Locally Significant Industrial Site. Includes 205 apartments and flexible light industrial commercial floorspace to reflect the industrial heritage of the site.

Green Man Lane Estate

Redevelopment will be achieved through the phased demolition of the existing 464 homes, making way over four phases for 714 new properties for affordable rent, shared ownership and outright sale.

Boston Rd

Demolition of an existing Wickes retail store and Nissan car dealership to initially provide 283 residential units with a new retail frontage comprising 1,400m² of commercial uses around a public square.

CHAPTER 4

TOWN CHALLENGES

WHAT WE'VE HEARD

The first phase of non-statutory engagement on the new Local Plan for Ealing was launched on 10 November 2021 as a suite of activity under the “Shaping Ealing” umbrella. It consisted of an online survey on the GiveMyView digital platform and a series of community engagement events held in various parts of the borough. The online survey has received 10,254 responses until 31 March 2022. The proportion of responses varies by area, and while responses from Ealing (41% of total as compared to 25% of the borough’s population resident in Ealing) and Hanwell (10% vs 8% population) towns are disproportionately larger, responses from all other town are smaller as compared to their populations. The key things which Hanwell residents believed to be bad about their local area are presented below:

There was **27%** net disagreement that Hanwell has a good range of shops and leisure facilities. This was significantly lower than the borough average.

There was **12%** net disagreement that Hanwell has clean air.

There was **40%** net disagreement people were happy with the way Hanwell is changing. This was a significantly higher net dissatisfaction than the borough average.

There was **13%** net disagreement that Hanwell has good employment opportunities.

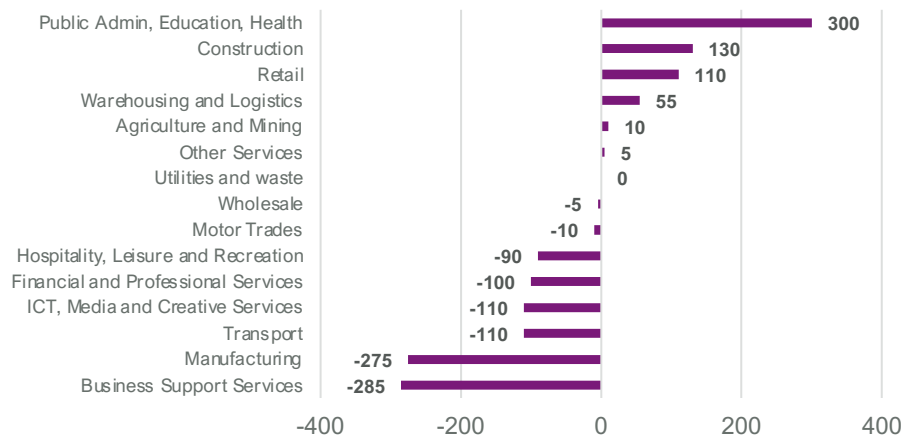

KEY CHALLENGE: ECONOMIC DIVERSITY

WHAT THE EVIDENCE SHOWS...

Hanwell is currently heavily reliant on public sector and foundational economy employment. Despite its strategic location, Hanwell hosts a lack of higher value jobs.

- The public sector is the largest employer in Hanwell. Over 2,000 jobs are in Public Admin, Education, and Health. The majority of jobs are in Primary and Secondary Education, and General Health Activities. Public sector employment has grown in recent years, increasing by 300 jobs since 2016.
- Despite this, higher value employment in Professional Services, ICT, Media and Creative Services has fallen. Since 2016, the number of jobs across these sectors has decreased by 210. Anecdotally, many residents work in the media/creative industries elsewhere in London for organisations such as the BBC and Sky.
- Hanwell has the smallest amount of office floorspace in the borough. At 4,000sqm, this leaves limited opportunity for economic diversification, and space for new businesses to start, seed, and grow.

Hanwell– Employment change: 2016-2020

Hanwell– Sector profile

Sector	Absolute Employment Count	% of sector	LQ
Public Admin, Education, Health	2060	39%	1.46
Hospitality, Leisure and Recreation	525	10%	1.01

CHAPTER 5

HANWELL'S OPPORTUNITIES

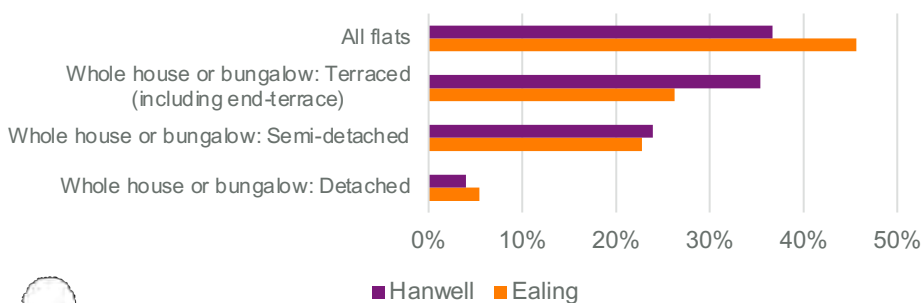

OPPORTUNITY 1: DIVERSIFYING HANWELL'S HOUSING OFFER

A POTENTIAL PRIORITY COULD BE...

Diversifying Hanwell's housing typologies to address demographic challenges and support place vitality.

- There is evidence to suggest that housing typologies in Hanwell are contributing to the town's shrinking, ageing population. Compared to the borough average, Hanwell has more homogenous housing provision than the borough average.
- 37% of residential properties in Hanwell are flats compared with 46% in Ealing as a whole. By diversifying housing provision, this could address Hanwell's shrinking and ageing population challenges by creating different spaces at more affordable sizes.
- Whilst this will in part be addressed by higher density developments such as Hanwell Square on Boston Road, the Towns Forum might want to consider the range of housing that Hanwell is likely to need to support the needs of both new and existing communities to ensure new development caters for intergenerational needs.

Housing typologies in Hanwell, 2011

Case Study 1: Intergenerational Housing - Buccleuch House, Hackney

- Renovation of previously run-down bedsit accommodation, providing poor quality dwellings.
- The project provided bespoke accommodation for three distinct groups each with their own specific needs and design briefs. This included: first-time buyers, Orthodox Jewish families, and housing for older people. The design focused on creating a new community within one new unified building. The intention was to create a diverse scheme where residents enjoy interacting and sharing space and time together.
- Buccleuch House has won several design awards since completion in 2015, and is seen as exemplar for bringing together three specific communities in one building.

OPPORTUNITY 2: SUPPORTING NASCENT POTENTIAL TO SCALE TO PROVIDE MORE LOCAL JOBS

A POTENTIAL PRIORITY COULD BE...

Use the arrival of Crossrail to support economic diversification and consider Hanwell's economic identity.

- Despite higher value employment falling in Hanwell over the last five years, the town retains business specialisms in ICT, Media, and Creative Services businesses which accounts for just under a quarter of businesses within the town (24%).
- The arrival of the Elizabeth Line represents a unique opportunity to re-evaluate what Hanwell needs to grow and diversify its economy. The Town Forums may consider working with key anchor local institutions such as Ealing Hospital to understand the potential and capacity for local innovation clusters.

Hanwell Business Profile, 2021

Sector	Absolute Businesses Count	% of sector	LQ
ICT, Media and Creative Services	305	24%	1.92
Financial and Professional Services	265	21%	1.01

Hospitality, Leisure and Recreation	70	5%	0.69
Public Admin, Education, Health	70	5%	0.94
Other Services	40	3%	0.89
Transport	30	2%	0.67
Motor Trades	25	2%	0.69
Wholesale	25	2%	0.49
Manufacturing	20	2%	0.31
Warehousing and Logistics	20	2%	0.95
Agriculture and Mining	0	0%	0.00
Utilities and waste	0	0%	0.00
Total	1290		

Case Study 2: Whitechapel Life Sciences Cluster

- Located in east London, Whitechapel is well placed as a life sciences hub, with high commutability within London prompted by the planned arrival of the Queen Elizabeth Line, and the science talent created by both Queen Mary University (QMUL) and Barts NHS Trust.
- In addition to the already successful Queen Mary Bioenterprises (QMB) Innovation Centre, the Queen Mary Enterprise Zone has just launched an innovation space dedicated to growing and scaling digital health, medtech and AI SMEs. This co-working space is just across the road from a new research institute, focused on digital and data sciences.
