Introduction

What is the Policies Map?

Covering the whole borough, the Policies Map illustrates geographically the application of policies in the adopted DPDs. In this regard it will:

- identify areas of protection, such as Green Belt and nature conservation sites, defined through the development plan process,
- allocate sites for particular land use and development proposals included in any adopted development plan documents,
- and in doing so, sets out the areas to which specific policies apply.

Given the interdependent relationship between the designations on the policies map and the policies in the DPD, the table at appendix 1 of this booklet has been prepared to identify the relevant 'policy hook'/antecedent for each of the designations/layers shown on the policies map (including this booklet).

The Policies Map comprises a large scale map sheet (approximately A0 size), prepared on an Ordnance Survey base, at a scale which is sufficient to allow the policies and proposals to be clearly illustrated. This main map sheet is also supplemented by a separate map booklet (i.e. this document), comprising schedules of all sites/designations, and accompanying map sheets. The Policies Map Booklet effectively provides a gazetteer for the Policies Map, which complements the DPDs themselves.

What is the purpose of this document?

With regard to the paper version of the Policies Map, whilst the large scale policies map illustrates the key policies designations, for reasons of legibility it is not possible to differentiate between the various classifications that may exist for an individual designation on the main map sheet. This additional level of information with regard to individual layers, displayed graphically, can be helpful in guiding the application of policy and accordingly is provided in this booklet. Moreover, there are a number of associated layers (e.g. areas of deficiency) which are not designations per se, but rather derive from these, and help in our understanding of the main designations and the application of policies to these. This detail is therefore better provided on separate map sheets. The maps and accompanying schedules in this document have been grouped into general thematic headings.

This print version of the plan is also supplemented by an online interactive version of the Policies Map. This contains all of the detail contained in the paper version. In addition other potential planning constraints maintained outside of the development plan process, including for example conservation areas, listed buildings, scheduled ancient monument, watercourses, flood risk areas, and transport safeguarding areas, are viewable on the interactive document.

Landmarks Map Sheet 8

Appendix One:

The table below has been prepared to identify the relevant 'policy hook'/antecedents for each of the designations/layers shown on the Policies Map. The source of these policies include the adopted London Plan, Ealing's Development (Core) Strategy, Development Management DPD and the Development Sites DPD. A separate column for the Development Sites DPD has been omitted, as only the Development Sites designation relies on this DPD for its policy hook. The primary 'policy hook(s)' for each designation is highlighted in bold. Other policies of relevance are identified in italics. Please note that whilst other policies of relevance have been included, this list is not exhaustive.

| Designation/Layer | London Plan (2011) | Development Strategy | Development Management DPD |
|---------------------------------------|--|--|--|
| Green Belt | 2.18 'Green Infrastructure: The Network of Open and Green Space 7.16 'Green Belt' Map 2.8 'London's strategic open space network' | 5.1 'Protect and Enhance Metropolitan Green Belt' Map 7 | 2.18 'Green Infrastructure : The Network of Open and Green Spaces (Local Variation)' |
