Introduction

The Community Infrastructure Levy (CIL) Regulations 2010 (as amended) require all local planning authorities that issue a CIL liability notice, or enter into Section 106 (S106) planning obligations, during a reporting year, to publish an annual Infrastructure Funding Statement (IFS), by 31 December each year, for the preceding financial year - 1 April to 31 March.

For the monitoring year spanning 1 April 2024 to 31 March 2025, the council did not charge CIL. Therefore, this IFS only reports details of S106 planning obligations.

The council collects MCIL on behalf of the London Mayor. This is passed quarterly to Transport for London (TfL), who use the money to fund the delivery of regional transport infrastructure such as the Elizabeth Line. The council retains 4% of the MCIL receipt to cover administrative costs.

The purpose of the IFS is to provide public information on collection, allocation and expenditure of developer contributions to provide transparency and accountability.

What is a Section 106 (S106) agreement

Planning obligations under Section 106 of the Town and Country Planning Act 1990 (as amended), commonly known as S106 agreements, are legal obligations which assist in mitigating the impact of unacceptable development, to make the development acceptable in planning terms. In general, they are intended to deal with impacts of the development, without which the proposal should not be given planning permission. They are negotiated and agreed between the council and a developer.

S106 contributions must be used in accordance with the terms of the legal agreement. These often specify what can be funded, where the money can be spent, and the timescale for spending the money.

S106 obligations can be both financial and non-financial. They can relate to on-site provision, such as the provision of affordable housing, or off-site provision, such as financial payments, to be used to fund a specific piece of infrastructure or delivery of affordable housing. They can also be used to control operations, such as the removal of car parking rights.

Planning obligations may only be agreed if they meet the three statutory tests that demonstrate they are necessary to make a development acceptable in planning terms.

The 3 tests are:

- necessary to make the development acceptable in planning terms
- directly related to the development
- fairly and reasonably related in scale and kind to the development

Agreements in the OPDC administrative area

It is necessary to note some agreements relate to developments, which are geographically within the boundary of the London Borough of Ealing, but which fall under the jurisdiction of the Old Oak and Park Royal Development Corporation (OPDC). The OPDC was established in 2015 and is the Local Planning Authority (LPA) for its administrative area, meaning it is responsible for plan making and taking decisions on planning matters within its administrative boundary.

When OPDC was first established in 2015, a scheme of delegation was agreed, which meant some large planning applications, located within both OPDC and London Borough of Ealing boundaries, would continue to be decided by the council. Consequently, the council manage the receipt and collection of S106 monies associated with these applications, on behalf of OPDC. The initial scheme of delegation ended on 31 March 2024, and all planning applications within the OPDC area are now decided by OPDC.

For the planning applications which were delegated to the council to determine, the council was responsible for leading on negotiating the S106 agreement. OPDC is a signatory to these S106 agreements and, is the LPA with final responsibility for deciding how the received planning contributions are spent.

There is a separate project funding approval governance process for spending S106 funds collected by the council from developments in the OPDC area. All project funding proposals are presented to, and assessed by, the Planning Officers Advisory Group (POAG). This group, which meets quarterly, comprises representatives from each of the councils which the OPDC area overlays, and is chaired by OPDC.

OPDC reports separately on all funds received from developments in its administrative area, within its own Infrastructure Funding Statements. The council provides data to support this. The information relating to OPDC S106 receipts, allocation and spend is not duplicated within this IFS document.

Information by town

The council takes a 'town-based' approach to recording S106 agreements. This assists services to identify more easily what funds are available for spend in each area. Each S106 agreement is allocated a unique code, with the first letter of the town at the beginning. For example: A = Acton; S = Southall.

Summary

Appendix A: Case studies of projects delivered through S106 funding

Highways and Transport Case Studies

Get Southall Moving

Total S106 spent in reporting year: £562,895.29

This scheme improves cycling connectivity, pedestrian safety, and accessibility in Southall while addressing anti-social behaviour and environmental issues. Key works include renewing footways and cycle tracks on Merrick Road, upgrading lighting, clearing overgrowth, and installing Copenhagen-style junctions for pedestrian priority. Additional measures include raised tables for better sightlines, improved industrial estate access, guardrails near Hamborough School, and a new permeable footpath at Norwood Green Play Park. Further initiatives cover preliminary designs for Avenue and Havelock Roads, feasibility for a Merrick Road footbridge lift, cycle parking near the Gurdwara, and completion of the Southall Station Cycle Hub.

Visions for Northolt – Highways, transport & town centre regeneration

Total S106 spent in reporting year - £317,017.00

Funded by the Levelling Up Fund and S106, this project transformed Northolt's public realm and active travel infrastructure in partnership with TfL. Key improvements included segregated cycle lanes, widened footways, upgraded crossings, and enhanced signage along Kensington Road and Mandeville Road. Green infrastructure—such as new trees, soft landscaping, and LED lighting—boosted biodiversity and climate resilience. Village Green was redesigned into a pedestrian-friendly space with seating, lighting, and heritage features.

The scheme delivered safer school routes via zebra and toucan crossings, protected cycle lanes, and Copenhagen-style junctions. Sustainability measures included 1,000m² of Sustainable Drainage Systems and 20 new trees. Improved links to Northala Fields and the Grand Union Canal promote active travel and recreation, creating a greener, more inclusive environment that strengthens Northolt's identity and long-term social and environmental goals

Carbon Offsetting Case Study

Pupils Profit

Total S106 spent in reporting year - £14,945.00

Pupils Profit is a student-led initiative promoting sustainability through eco-refill shops that sell everyday essentials like washing liquid and hand wash, reducing single-use plastics. Students gain hands-on experience in finance, marketing, and sales, building confidence and teamwork skills while learning responsible business practices. This year, seven Ealing schools launched their own refill shops, encouraging low-waste habits and changing attitudes toward waste.

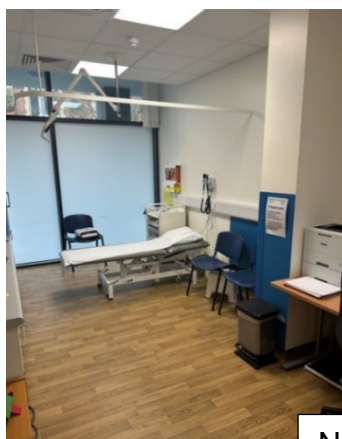

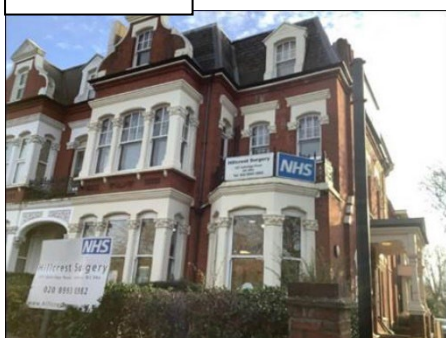

Health Case Study

Hillcrest Surgery relocation and refurbishment

Total S106 spent in reporting year - £1,577,821.15

This scheme involved the relocation of Hillcrest Surgery to a new, modern, fit-for-purpose site in the Acton, funded by £1.5m of S106 contributions. The scheme delivered four additional consulting rooms, two tele-consulting rooms, a tele-triage area, and expanded admin space. The project has supported the medical practice's continual expansion of its training programme for junior doctors and medical students while delivering high-quality patient-centered care. The new premises further improve accessibility by being closer to public transport, with improved visibility for patients, level access to clinical rooms within the surgery, and better level access at the entrance.

Education Case Study

John Chilton School Expansion

Total S106 spent in reporting year - £2,874,980.00

The project provides additional school places for children and young people with an Education, Health & Care Plan for special education needs, and is being funded through multiple funding sources including S106.

The project was prompted by a further significant rise in pupils born in the last 10 years seeking special school places in the borough. There has been a rise in pupils who may have moderate to severe learning difficulties as a primary need or as a dual diagnosis to their medical or physical needs.

To enable the school to expand, additional classrooms and specialist learning spaces have and are being provided, with the accommodation meeting government requirements and guidelines. This is a multi-phase project with a number of phases already complete, a current phase on site and a further phase to follow.

Creation of enclosed break out workspace to atrium with glass partition, alterations to storeroom, addition of a hoist to a changing room and provision of new kitchenette and improved storage to the first-floor music/meeting room for flexibility.

AFTER Photos- showing enclosed office area to the atrium space, new kitchenette & new storage provision

Provision of a New refurbished Classrooms

Provision of Indoor Special Needs equipment

Provision of a New play equipment

Sustainability Features

Energy-efficient Design

- Replacing dimmable lights, fluorescents and spotlights Use of LED lighting
- Use of PIR sensors to conserve energy
- Improving plant room equipment with new air-source heat pumps

Climate Change Mitigations

- Doorway drainages mitigate flood risks.
- Increase green areas and use of permeable tarmac improving UGF of school sites.

Locally-source and recyclable materials

- Locally - sourced natural bricks and roof slates in the UK
- Recyclable contents in products

Employment and Skills Project Case Study

Learning Zones Equipment West Ealing

Total S106 spent in reporting year - £ 14,520.43

Learning zones are spaces, with access to public computers, free Wi-Fi, where people can receive skills training and employment support, including improving digital skills, support applying for jobs and accessing public services. Hundreds of residents have received help with improving their digital skills and finding work since the first learning zone was opened in Northolt in October 2022.

This project delivered a new space at West Ealing where residents can boost their digital skills, get employment support, and explore new learning opportunities. The project was delivered by Learn Ealing, the council's adult learning and skills team, with events aiming to help residents:

- use artificial intelligence as a tool for everyday life
- develop work-ready skills
- become smarter with money
- get to grips with digital tools
