

Inspectors' questions 2

OIS8 (now referred to as OIS7) Greenford Green

I have further questions having seen representations on behalf of SEGRO about consistency with the development plan and general conformity with the London Plan:

1. Can you confirm the status of the UDP policies which relate to the OIS7?
2. Can you explain how the Development Strategy (DS) deals with the development site as a whole including any distinctions for the land referred to by SEGRO and how the DS Inspectors' report dealt with the site? Did the GLA make representations about this land at the DS stage?
3. Can you show me where the boundary of SIL is defined and who defined it? Is development site OIS7 changing/creating a defined SIL boundary?

These questions relate to procedure and compliance. The delivery and justification for the allocation in terms of meeting the strategic objectives of the DS are likely to be discussed at the hearing.
